Our mission is to transform imagination into immersive reality by combining visionary storytelling with advanced technology to create bold, world-class entertainment that shapes the future.

COMPANY OVERVIEW

Laggin' Out Entertainment is a full-service production studio dedicated to turning bold ideas into immersive, cinematic realities. Specializing in film, animation, visual effects (VFX), artificial intelligence (AI), augmented reality (AR), and extended reality (XR), the company integrates innovative storytelling with cutting-edge technology to produce compelling, future-focused content.

Guided by experienced industry leaders, Laggin' Out Entertainment collaborates with creators, brands, and forward-thinking organizations to develop world-class productions that engage audiences, strengthen narratives, and help shape the evolving landscape of entertainment.

PAST PERFORMANCE

Sony Pictures / Disney / EA Sports / History Channel:

Delivered complex 3D animation, motion capture integration, and cinematic visual sequences for feature film, television, and interactive gaming productions on tight deadlines. Gemstone Media / Reel Insight / Upstaging: 100% client retention rate; referred by Pine Ridge and retained as active repeat partners across multiple commercial productions.

DIFFERENTIATORS

- Ability to work in multiple genres such as military simulations, game design, and network television
- 100% client retention across all media and IT service engagements
- FAA Part 107 drone + Unreal Engine certified — rare dual capability for simulation and aerial ISR-style production

CORE COMPETENCIES

- ▶ Virtual production using Unreal Engine for training & simulation
- ▶ AI-powered video & image generation for government media
- ▶ 2D/3D animation, modeling, rigging, motion capture, lighting, & compositing
- ▶ XR / VR / AR simulation environment development
- ▶ Full-service broadcast video production & post-production
- ▶ Motion graphics, animation & professional photography
